About RORACO

One supplier from kit to training

RORACO GmbH has supplied first aid and emergency equipment from Pressbaum near Vienna since 1933. Together with our sister company K&P Med we deliver the equipment, train the people who use it and service it afterwards – for UN agencies, field missions, ministries and companies. This catalogue shows our main product lines with RORACO reference numbers; the full list of 590+ articles is available on request.

Trauma and bleeding-control simulation

Silicone task trainers with bleeding function, wearable wounds and wound kits, trauma manikins and moulage – for tourniquet, wound-packing and scenario training of military, medics and first responders.

Tourniquet trainers

Silicone arm or leg with bleeding function, tubing and pump – realistic tourniquet practice under pressure. Single limb or sets of 2 and 4.

On request · 1, 2 or 4 limbs

Haemorrhage control simulators

Realistic arm and junctional (groin) simulator with bleeding function for tourniquet, pressure and packing training.

On request · arm, junctional

Wound-packing trainers

Bleeding wound blocks for haemostatic packing: laceration or gunshot wound, square, rounded or thigh version.

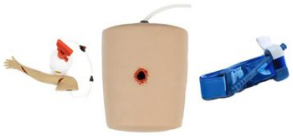

On request · 5 versions

Upper torso with chest wounds

Male upper torso with sucking chest wounds or bleeding wounds – chest seal and packing practice.

On request · sucking or bleeding

Bleeding-control trainer pack

Complete bag for instructors: tourniquet trainer or bleeding arm, wound-packing trainer, artificial blood, clotting gel, training gauze, gloves, training tourniquet.

On request · 2 versions

Wound-packing trainer pack

Wound-packing trainer with syringe or squeeze bottle, artificial blood, clotting gel, training gauze, gloves, carry bag.

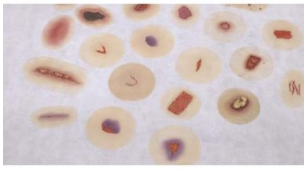

On request · 2 versions

Silicone wounds

Over 60 stick-on silicone wounds: abrasions, burns, eviscerations, fragmentation, gunshot entry and exit, lacerations, impalement, open fracture.

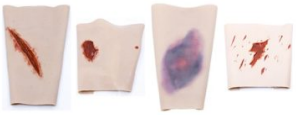

On request · 60+ types

Silicone wound kits

Ready-made sets in a carry bag: trauma, military, nursing and first aid.

On request · 4 kits

Wearable wounds

Strap-on forearm and thigh sleeves – burns, fractures, gunshot entry/exit, lacerations; many with bleeding function via syringe and tubing.

On request · 15 versions

Trauma and bleeding-control simulation

continued

Clinical wound models

Pressure injuries in all stages, skin tears, dehiscence, ulcers and infected wounds for nursing and wound-care training.

On request · 40+ models

Simulation accessories and service

Training tourniquets, training gauze, artificial blood, clotting gel, tubing, pumps, brackets, padded bags and cases; service and repair of tourniquet trainers.

On request

Advanced trauma manikin

Full-body manikin with 16 interchangeable wounds: burns 1st–3rd degree, open fractures, gunshot wound, evisceration, amputation. Wound set also available separately in a case.

manikin or wound case
